

Eggstimation

There are a number of eggs hidden in the park, and your task is to determine as accurately as possible how many there are – but don't overestimate! Teams who correctly guess the correct number of eggs will be first to receive the first puzzle, followed by teams who guess *below* the correct number, in order of the closeness of their guesses. Teams who guess *above* the correct number will be last to receive the first puzzle – again, in order of the closeness of their guesses.

Happy hunting – but please, leave the eggs where they are!

Team name: _____

Estimated number of eggs: _____
